

Bri-Tech Home Technology introduces Adagio.

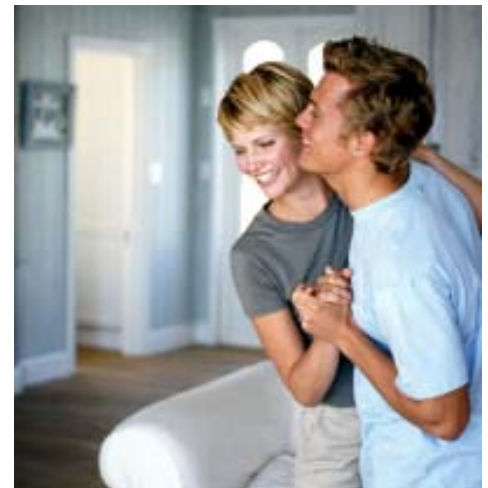

Adagio allows you to enjoy your music your way. Imagine all your family's music - CDs, MP3s, satellite radio- all brought together in a single system and accessible from anywhere in your home. Listening to music should be this easy. With Adagio, it is. And audio is just the beginning.

From simple to sophisticated, Adagio starts as a complete, integrated audio distribution system, but offers the expandability and connectivity of Crestron Total Home Technology. Add Crestron touchpanels, lighting and thermostats at any time. Whether as a stand-alone system or a part of a larger custom home solution, Adagio offers simple installation and an enhanced user experience. No other audio distribution system provides the flexibility and expandability of Adagio.

Adagio delivers a complete, cost-effective solution for high-performance multi-room audio distribution. Right out-of-the-box, the AADS Audio Distribution System and AES Entertainment System each provide sophisticated audio signal routing, processing, and amplification for up to 6 rooms, with easy expansion using the AAE Audio Expander.

A choice of integrated AM/FM and XM Satellite Radio on the AADS, or modular AM/FM, XM and Sirius Satellite Radio tuner cards on the AES, let listeners in each room choose from their favorite radio stations. Plug-and-play compatibility with Crestron's AAS Audio Server and CEN-IPOD Apple® iPod® Connect delivers easy access to an entire CD collection's worth of music.

As the centerpiece for any home audio system, the AAS Audio Server provides an easy way to store and catalog a complete music collection, with instant access to any album or track from touchpanels, keypads and computers throughout the home.
