

Conference Rooms

Bri-Tech presents turn-key electronic systems for conference, training, presentation rooms and executive offices. Working with your space our designers consider all the details:

- Lighting
- Acoustics
- Audio/Video
- Teleconferencing
- Network/Internet
- Controls

A room like this almost thinks for itself. When play is pressed on a wireless, color touchscreen, the shades automatically lower, simultaneously turning on the projectors and dimming the lights. This innovative control, with our custom programmed help screens, allows the user to utilize the room with minimal training. Table top connections for lap tops are also available for convenience and simplicity during that major presentation. Call us for system design, installation, software development, and on-going service.
