Performance Series Plasma Screens

- 1920 x 1080p High-Definition Resolution
- 16:9 Aspect Ratio

Behind the awe inspiring image of a PureVision plasma is the technology that creates a 1080p native resolution with more than 2 million individual pixels. The Elite PRO-FHD1 combines the higher pixel count of 1080 interlace with the smooth refresh of 720 progressive. Allowing for a more accurate picture when viewing fast-moving content such as action films or sports with the amazingly sharp, bright, accurate picture quality for which Pioneer is known.

Bri-Tech, a certified Pioneer Elite Dealer, also offers ISF calibration which will guarantee optimal performance and stunning image quality resulting in an *unsurpassable* home theater experience.

The PRO-FHD1 is leading a new dimension in High-Definition from Pioneer®. In concert with high-resolution amplifiers and speakers, as well as Bri-Tech's advanced knowledge and engineering, this new plasma creates the ultimate home theater.
