SEMS
Building Automation System

model - description

SEMS | Security & Energy Management System

SEMS-MCP | Main Control Panel

Requires 110VAC 5A
Size 24"Wx 44"H x 6" Deep (each)
(can be partially recessed in wall)

Existing facilities can now be upgraded to "Smart Buildings" at a reasonable cost with SEMS. The system is designed for buildings 8,000 sq. ft. - 250,000 sq. ft. and offers an array of features that are available through large industrial control firms, but without hefty expense.

- Security Measures
- Lighting Control
- HVAC Control
- Power Monitoring

SEMS allows owners and managers to see building systems via computer, tablet or smartphone. The system can be upgraded as needed to include integrated security and door control.
