# Modular PA System Overview

The CODA Modular PA System is a public address solution designed for straightforward installation, reliable performance, and compatibility with existing 70V audio infrastructure. Assembled at Bri-Tech's headquarters in Bohemia NY by Inspirence, CODA features a modular design, secure Bluetooth audio, emergency alarm integration, and smart monitoring with feedback-free microphones.

Specification	Details
Power Output	Up to 8000 W per expansion panel
Wireless Microphones	Supports 2-4 units
Connectivity	Bluetooth audio, secured, emergency system input, monitoring output
Compatibility	Works with existing 70V speaker systems
Dimensions	7 in (D) × 3 ft 4½ in (H) × 2 ft 1 in (W)
Nominal Input Voltage	110-120 V AC, 50/60 Hz

## Key Features

- Modular, compact design – easy to install and scale
- Emergency alarm integration for enhanced safety
- Smart system monitoring and diagnostics
- Feedback-free wireless microphones (2-4 supported)
- Secure Bluetooth audio with password protection
- Works with existing 70V systems

## Ideal Use Cases

- Educational facilities requiring reliable, clear communication
- Schools needing integration with fire alarms and emergency alerts
- Campuses seeking a modern, easy-to-manage PA system
- Institutions replacing outdated AV racks with minimal disruption
